The System Installation and Recovery DVD performs operating system (OS) installation and configuration. Keep this DVD in a safe place. After initial configuration, you can use this DVD to restore the operating system to factory defaults.

⚠️ CAUTION: During a recovery process, this DVD will overwrite the original OS logical drives. **All data on these drives will be erased.**

**Instructions**
1. Connect a keyboard, monitor, and mouse directly to the storage server.
2. Insert the System Installation and Recovery DVD in the drive and allow the machine to boot from the DVD.
   If you are installing the OS for the first time, the process completes with no intervention required. The machine automatically reboots more than once.

⚠️ CAUTION: Do not interrupt the installation process.

3. When processing is complete, log in to the storage server as follows:
   - Administrator name = administrator
   - Password = hpinvent

For more information about installing or using this DVD for system recovery, go to www.hp.com/go/nas.
