

Three IT essentials for small and midsize businesses

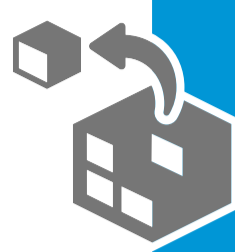

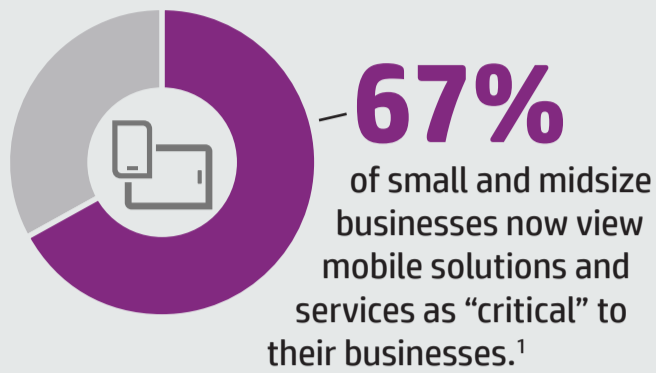

Close the gap between business demands and IT capabilities with technology that is **simple, reliable, and affordable**

Global trends are changing the way you do business.

Mobility

Your customers and employees want to interact with you on their own devices and their own terms.

Big data

Your customers expect you to know them personally.

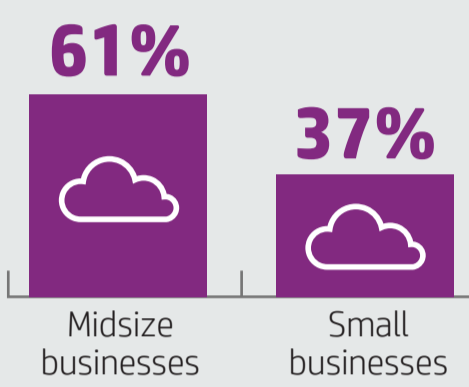

Currently deploying business intelligence/analytic applications:²

Cloud

Your data and IT services can now be anywhere.

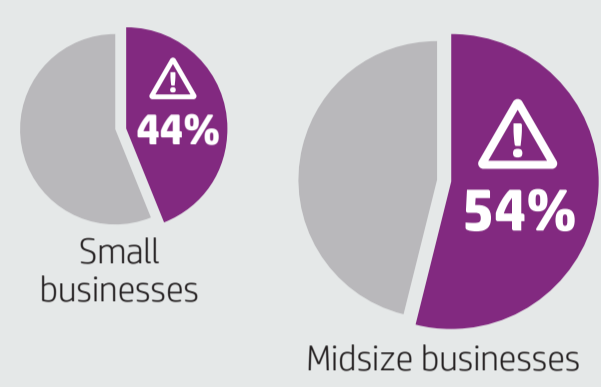

Percentage of businesses that subscribe to cloud-based backup and disaster recovery:²

Security

Your business faces the constant threat of cyber crime.

Percentage of businesses that have suffered data security breaches in the last year:²

These trends are creating a growing gap between business needs and IT capabilities.

Close the IT-business gap with technology based on three pillars: **simple, reliable, and affordable**

61% of SMBs ignore new technologies if they are too complicated.³
These companies need a solution that is...

The average cost of downtime is **\$7,900** per minute.⁴
To avoid these costs, companies need a solution that is...

More than **50%** of SMBs cite their top business concern as reduced costs/expenses.⁵
To shrink the budget, companies need a solution that is...

Simple

- Solutions that are easy to deploy, use, and manage
- Products tailored to small or midsize businesses
- Local consulting, training, and support

Reliable

- High-quality solutions based on validated configurations
