HP provides you with access to a designated HP hardware technical support group of Level 2 specialists.

HP Hardware Technical Support service provides a remote hardware telephone support service on selected HP and Compaq branded hardware products including enterprise printers for large enterprise accounts, self-maintainers, and HP channel partners who require a high level of technical support.

HP provides you with priority access to a designated HP technical support group of Level 2 specialists who offer priority problem escalation, if required.

Telephone support includes both hardware product advisory and technical operations support, which covers questions about hardware product usage and the function of specific components. It also includes directing you to additional documentation regarding a specific hardware product or question, providing information on the interpretation of hardware product documentation, and clarifying and interpreting hardware product error codes.

HP Hardware Technical Support also provides answers to hardware product installation, upgrade, configuration, and startup questions about HP hardware products covered by the service. This includes support for HP hardware management utilities during the warranty period of the eligible HP hardware products. In addition, you receive suggestions for corrective procedures for known problems, such as configuration or diagnostic problems.
### Service benefits

This service provides:

- Fast response
- Improved productivity of your technical staff
- Expedited issue resolution

### Service feature highlights

- Access to Level 2 hardware technical support specialists
- Both product advisory and technical operations support
- Access to electronic support information and services
- Additional named callers (optional)

<td><strong>Hardware technical support</strong></td>
<td>For assistance in hardware problem diagnosis and resolution on selected HP products, HP provides the Customer’s technical assistance center (TAC) or certified technician with priority access to HP Level 2 technical specialists via telephone or electronic communication.</td>
</tr>
</tbody>
</table>
| **Hardware product advisory and technical operations support** | For selected HP or Compaq branded products, HP will provide both hardware product advisory and technical operations support, which includes the following:  
  - Provide answers to hardware product usage questions, including support for HP drivers and firmware  
  - Answer questions about the function of a specific hardware component  
  - Direct Customers to additional documentation regarding a specific hardware product or question  
  - Provide information on the interpretation of hardware product documentation  
  - Clarify and interpret hardware product error codes  
  - Answer hardware product installation, upgrade, configuration, and startup questions about HP-supported hardware products, including support for HP-provided hardware management utilities  
  - Suggest corrective procedures for known hardware problems, such as configuration or diagnostic problems |
| **Coverage window** | The service coverage window specifies the time during which the Customer may call HP. Service is available 24 hours a day, Monday through Sunday including all HP holidays.  
  This coverage window is subject to country availability. Check with the local office for detailed information on availability. |
| **Access to electronic support information and services** | HP will provide access to hardware-related electronic and Web-based tools and services, such as firmware updates and proactive notification services.  
  In addition to access to services available to registered users, Customers with a hardware technical support contract will also benefit from the ability to search technical support documents to solve problems, access passwords required to use HP proprietary diagnostic tools, and submit and check the status of hardware technical support service requests. |

Service eligibility

Eligible Customers include HP Customers with selected HP hardware products who are:

- Channel partners, or
- Enterprise self-maintainers enrolled in region-specific self-maintainer programs, if applicable, or
- Enterprises with an onsite hardware warranty or contract with HP or an HP authorized service partner

Customer responsibilities

The Customer will be required to:

- Provide the name and telephone number of up to three employee contacts who are authorized to utilize this service and can direct and approve activity from HP response centers in the event of a critical problem (additional named callers may be added for an additional charge)
- Protect the Hardware Technical Support phone number and access PIN from unauthorized use
- Adhere to licensing terms and conditions regarding the use of HP service tools, as applicable
- Maintain personnel trained through an HP approved program who are capable of using any relevant service and diagnostic tools.

Service limitations

Depending on call volume, a Level 2 specialist may not be available for service outside of normal business hours. When this occurs, the Customer will be forwarded to the next available technical specialist to avoid response delays.

Services such as, but not limited to, the following are excluded from this service:

- Support for the following HP hardware products:
  - Enterprise storage products, such as SAN (other than basic interoperability issues)
  - External network devices, such as routers or network topology devices
  - HP NonStop servers
  - HPUX-based and HP MPE/iX-based hardware systems
- Direct support for the operating system

- Services that, in the opinion of HP, are required due to improper treatment or use of the hardware product
- Actual repair of product malfunctions
- Services required due to unauthorized attempts by non-HP personnel to repair, maintain, or modify the hardware product
- Services required due to causes external to the HP-maintained hardware product
- Software licenses, media, and documentation updates
- Support for hardware not supported by HP
- Software support services

- Maintain hardware at the latest level in accordance with manufacturer’s standards, recommendations, or schedules

- Be responsible for either providing trained technical contact (Accredited Platform Specialist [APS] certified or higher) or implementing a technical assistance center (TAC) to act as the intermediary on all service issues between HP and the Customer. The technical contact or TAC engineer will:
  - Provide the initial level of service to the Customer’s end users for each service request
  - Be prepared with product documentation when logging a Hardware Technical Support service request and be able to provide details on the current configuration and topology, including hardware platform(s), operating system(s), and application(s)
  - Maintain an HP approved level of hardware remedial maintenance expertise capable of providing competent technical support to the Customer’s first-line engineers
- Purchase this service for each HP system for which the Customer requires Hardware Technical Support
General provisions/Other exclusions

- A Level 2 technical support specialist is an experienced and APS certified (or equivalent) hardware support specialist who typically handles questions and problems that have already been initially worked on by the Customer or a Level 1 technical resource.
- HP reserves the right to perform a site audit and request serial numbers for all HP products under this service in order to validate system population count.
- Hardware Technical Support service requests on HP hardware products not covered under product warranty or an onsite hardware support contract will be subject to additional charges.

Service coverage

HP Hardware Technical Support provides coverage for selected HP or Compaq branded commercial hardware products, which may include Intel® processor–based servers, desktops, enterprise printers, and portables as well as selected Alpha systems and peripherals.

Check with your local HP sales office or HP reseller for detailed information on HP hardware product coverage.
